Dear Prof. Evans,

Thank you for all the suggestions from different people.

Due to the space limit and the book is under a series, we have our own template for each series.

Please send me only your photo for possible inclusion at the back cover with your short bio. if there are still spaces for it.

Now we have everything we need for the cover. Please let our Artist to come out with the drafts and we will send you the drafts when they are ready.

Regards,  
Yeow-Hwa Quek.

Yes this is a good suggestion by the book's professional indexer, Linda Caravelli. World Scientific usually uses the author name only on the front dust cover and title page and spine. The qualifications are sometimes given on the back page, in my case B. Sc., Ph. D., D. Sc. (Wales). Civil List 2005 can also be added but this does not carry letters after one's name, such as C.H. (Companion of Honour) or before one's name such as "Sir" (a Knighthood). The Civil List 2005 is essentially equivalent to C.H. or Knighthood, there being 25 Civil List pensioners, 65 Companions of Honour and several hundred Knights in Britain and the Commonwealth.

To Mr Quek of World Scientific : I very much like this type of work by Sean Mac Lachlan of Hewlett Packard Inc (webmaster of [www.aias.us](http://www.aias.us) and [www.atomicprecision.com](http://www.atomicprecision.com)). I will go with Sean's work if you are agreeable, for both front and back covers. I think the quality and resolution is already adequate for a dust jacket. Maybe Sean and your staff can choose the ultimate photograph from the 17 prints of the Taughannock sequence. I will go with whatever you agree upon.

Dear Prof. Evans,

Thank you for sending me the suggested figures.

I must emphasize that we normally will feature illustration on the cover that can best represent the themes/topics discussed/mentioned in the manuscript.

Please let me know if you want us to prepare the cover drafts base on your preferred illustrations sent yesterday.

Regards,  
Yeow-Hwa Quek.

for AIAS Sites

This completes the highest possible quality electronic transfer of the original seventeen prints of the Taughannock Sequence using my limited resources here. The originals are A4 Kodak Ektar prints. The original negatives are also here.

---

Dear Prof. Evans,

Thank you for your email to me.

As I have mentioned before, the book will tentatively be printed some time by the end of September 2005 if everything goes on smoothly.

Please send me your preferred color illustration in tiff format with at least 300 dpi so that we can work on the cover now.

Regards,  
Yeow-Hwa Quek.

Dear Mr Quek,

Can you advise when this book will be published - presumably in two or three weeks? Many thanks,

Myron Evans  
(Civil List 2005, WS Series Editor)

Dear Prof. Evans,

I am sorry to inform you that I have just received instruction from our Management to stop publication of your above book "Generally Covariant Unified Field Theory".

We regret for causing any inconveniences.

Regards,  
Yeow-Hwa Quek.
