Hey Evans,

ECE theory is mainstream, yet no one cites it in scientific journals except derisively. What a lot of garbage, maan!! Don't you see that people see your blog just to laugh at YOU!!! Ha! Ha!! Ha!!!!

No Bell Prize, my foot!! Thy blog befits a buffooooooooon, maaan!!

Dear Myron,

You will be pleased to know that ECE Theory has been totally and completely accepted by the Academy of Sciences in Ruritania. Beginning August 2006, it shall be compulsorily taught from kindergatern to Grave 29.

We have begun plans to generate electricity from spacetime, using your theory. For that purpose, we have boughnt three copies of your book. Two of our experts have been granted worldwide patents (so you yourself can no longer sell the idea to venture capitalists!), and their company hopes to market ECEE (the last E for energy) in July 2008.

We shall be pleased to host AIAS. Kindly arrange to transfer the two shelves of AIAS through Ruritanian Shipping Corporation Pty. Ltd. to Ruritania, Make sure that you fit in one of the shelves, as we would like to permanently install you in Ruritania after awarding you the Grand Cross of Ruritania.

Sincerely yours,

Morris TheCat
Governor of Ruritania

Sent from the Internet (Details)

This AIAS is a cult that I disapprove of. This is because its leader wrongly uses my geometry. I asked Albert, and he also does not want his name to be attached to this wrong theory.

Other members of this cult should start using their noogies: Their leader earns 1400 pounds p.a. and some disability pension, and was asked to leave four universities (Aberstwyth, Swansea, Cornell, and UNCC). Just because people look at atmicprecision.com/blog for their daily dose of free humour, he thinks there is worldwide interest in his theory. Jeffers, Hunter, Roy, and Dvoeglazov no longer consort with him. He was not invited to the last two Vigier Symposia. He rambles in his replies (as posted on the web).

Bye bye.

Elie

Today on www.atomicprecision.com: "In active refutation an AIAS staff member may choose to independently fire at will - i.e. systematically refute every harassing message. However I have already done this n times over. What these harassers are doing is ridiculous - they are attacking Cartan geometry. As Civil List scientist I am a juicy target for assorted nutters, so I generally just block them. My situation is equivalent to that of Newton as Master of the Mint, or Herschel as Astronomer Royal. The vast majority of decent academics know this clearly."

WHAT CONCEIT! As a Civil List pensioner, he has no significant official standing, not even as a junior scientist. He is a juicy target as he is a nutter.

Moreover, Cartan geometry is not being attacked, but his incorrect use of it is fair game!

"Note that harassment is a felony irrespective of any argument of philosophy. A felony is grounds for dismissal of an academic, even a police caution is sufficient grounds for dismissal, so let us use the force of the common law and also active refutation - flood them with refutations."

In addition to being Master of the Mint and the Astronomer Royal, this person is also a GREAT LAWYER and UNIVERSITY VICE-CHANCELLOR! Now think about it, he was an academic and he was dismissed. Surely then, he should know about sufficient grounds for coffee.
